## DSJ-350Y FTriangle Packaging Liquid/Jam Packaging Machine

### APPLICATION

This machine is designed and manufactured specifically for water, honey, oil, or similar liquid or density material products. Driven by a stepper/servo motor, the piston fills the liquid back and forth; In addition, the filling range can be automatically adjusted by the computer. The process of making bags, measuring, filling, sealing, cutting, counting, and hot pressing codes can be automatically completed. The packaging materials include several heat sealing layers, such as PET/electroplated AL/PE, PET/PE, NYLON, etc.

## MACHINE CHARACTERISTICS

1. The body adopts a stainless steel appearance, which is corrosion-resistant, easy to clean, and meets GMP requirements;
2. The equipment can choose three side sealing, four side sealing, and back sealing bag type, driven by a stepper motor, with a bag making accuracy error of less than 1mm;
3. Computer control, button operation, screen fault display, easy maintenance and operation;
4. Adopting advanced temperature control system, accurate temperature control, good thermal balance, ensuring the quality of heat sealing, suitable for various packaging materials;

## APPLICABLE SCOPE

## TECHNICAL PARAMETERS

Model	DSJ-350Y
Measurement method	The standard is a measuring cup or weighing type (the feeder can be customized according to different materials)
Packaging Speed	30-60pcs/min
Bag Size	L: 30-320mm W: 20-140mm
Max. Membrane Width	300mm
Filling Range	5-400 ml(g)
Sealing Type	Triangle packaging
Power Supply Power	220V 50Hz 1.8KW
Overall Dimensions	820×980×1980mm
Overall Weight	480kg

## ELECTRONIC PART LIST

NO.	NAME	Model and brand
1	PLC	Siemens (Germany)
2	HMI Touch screen	Siemens (Germany)
3	Pneumatic component	Air Tec(Taiwan)
4	Servo Motor & driver	TAMAGAWA(Japan)
5	Main motor	Zhaoqing(China)
6	Bearing	NTN (Japan)/NBC (Germany)
7	Temperature Control Meter	AISET
8	Heater	total about 3000-4000W
9	Material contact part 316S/S and the bodyshell-304 stainless steel.
