ZL-500 Rotary Granulator

MACHINE OVERVIEW

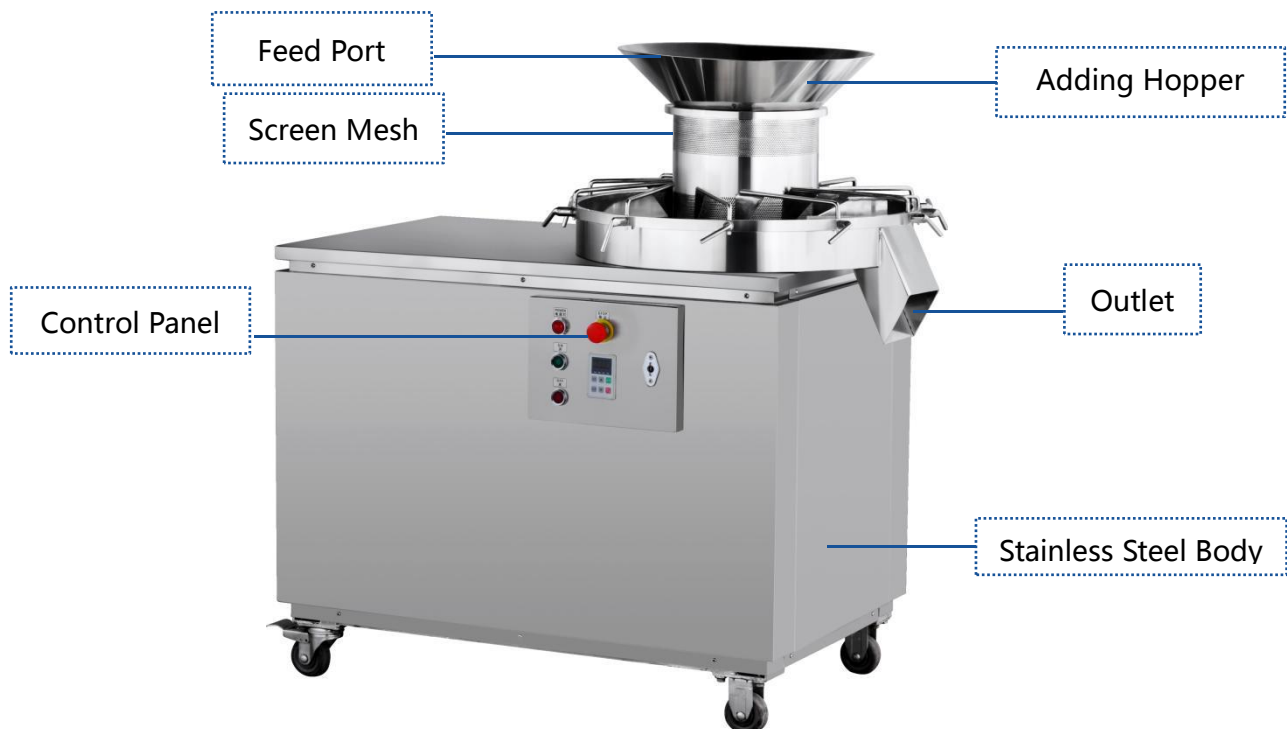

Mainly used for granulation in the pharmaceutical and food industries, such as granules and chicken essence.

Made of stainless steel, mainly composed of a rotating grinding blade, a screening cylinder, and a scraper. The material is squeezed out from the holes of the stainless steel sieve cylinder by a rolling knife, and at the same time, the extruded material is scraped off by a scraper on the periphery of the sieve cylinder to form particles.

EQUIPMENT FEATURES

- Its advantages are the use of a rotating material tray for feeding, equipped with a fixed length cutting knife, with an efficiency 2-3 times that of a swing granulator, and meeting standards, making it one of the ideal granulation equipment. Simple structure, easy operation, and convenient mobility. Automatic unloading compensates for the accumulation of material in the discharge of ZL type inclined hopper, and can be operated continuously. Some models can add a water cooling system for the batching tray. Suitable for semi dry powders and materials with certain viscosity, important granules, solid food beverages, chicken essence, etc.
- This machine adopts a specially designed planetary reduction mechanism, where the screen mesh and the whole grain knife rotate relative to each other, squeezing and rubbing the material between the whole grain knife and the screen cylinder, easily forming cylindrical strips from the mesh holes on the screen cylinder. When cut by the cutting knife outside the screen cylinder, uniformly sized and uniformly long particles are formed. The size and length of the particles are determined by the aperture of the screen cylinder mesh and the gap between the number of cutting blades.

PRODUCT STRUCTURE

TECHNICAL PARAMETER

MODEL	ZL-500
Grinding blade size (mm)	498
Granulation diameter (mm)	0.8 ~ 10
Motor power (kw)	22
Production capacity (kg/h)	550~1500
Dimensions (mm)	2100×1200×1550
Weight (kg)	1500

A dark blue horizontal banner featuring various medical icons in a lighter blue color. The icons include a blister pack of pills, a medicine bottle with a cross, two crossed capsules, a single capsule, two round tablets, a syringe, and another blister pack. The company name 'HANYOO' is written in a large, bold, white sans-serif font, with the Chinese characters '翰洋科技' in a smaller, bold, white sans-serif font directly below it.
